Amount of substitute water supply used: _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)
 Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES NO

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES NO
- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)
 Year _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES NO

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011.5 is sought in the future.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of a riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by means of return flow from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised regardless there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to water "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 3100 after specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new water diversion upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or the State Water Resources Control Board. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
